

MAAP - Mini Architectural Adapter Plates

Passive MAAPs with Audio, Video, Phone, Data, Power, and Control Connectors

MAAP - MINI ARCHITECTURAL ADAPTER PLATES

Extron MAAP - Mini Architectural Adapter Plates are optional mounting plates designed to work with our installation interfaces, installation distribution amplifiers, wall plates, floor plates, rack plates, and other products that feature MAAP openings. Over 120 different MAAPs are available featuring popular video, audio, phone, data, computer, and control connectors. There are also MAAPs available with engraved labels of the most common pass-through connections and blank MAAPs to fill empty slots.

Custom engraving is available for an additional charge. See page 205.

CTL208CM

Eight Button Control Module With Serial Output

DESCRIPTION

The Extron **CTL208CM** is an eight button control module that allows RS-232/422/485 serial commands to be sent with the touch of a button. This product installs in CPM Series modular connector frames, architectural interfaces or other products that accept a quad space MAAP. Custom engraving is available to label the button functions for an extra charge.

The CTL208CM utilizes the included ICS100 Control Software for simplified setup. Each button can be easily programmed to one of four operating modes: single - default, toggle, press/release, or continuous. Single mode sends the primary command code when the button is pressed. Toggle mode allows for the primary command code to be sent on the first press and a second command code to be sent when the button is pressed again. Press/release mode sends a command code when the button is pressed and sends a secondary command code when it is released. Continuous mode repeatedly sends the primary command code as long as the button is pressed. Individual LEDs next to each button illuminate when a button is selected.

An external international power supply is included, part # 70-055-01.

Button Groups

Available only for buttons that are assigned to the Toggle Mode, Button Groups allow buttons to be assigned to Group 1 or Group 2. Once assigned to a group, buttons operate in a mutually exclusive fashion - when one button is selected, others are deselected.

Timeout Feature

When the Timeout feature is engaged for a button, the unit will automatically send out the secondary command code string for that button after selected number of minutes. The timeout value can be set for 0 to 255 minutes. Since the timeout feature can be used to automatically turn off a device within a certain time, this feature is useful for projectors, plasma displays, monitors or other equipment that accept a serial command for power on/power off.

VCM 100 MAAP

MAAP Volume and Mute Controller

DESCRIPTION

The Extron **VCM 100 MAAP** provides remote volume and mute control of Extron MPA Series audio amplifiers and the MLP 101 and MLP 101 AAP mic preamps. It features a continuous gain control for fine adjustment of volume, and a dual color, illuminated pushbutton for muting the audio. The VCM 100 MAAP can be mounted into any Extron product or mounting frame with a double-space MAAP - Mini Architectural Adapter Plate opening.

CUSTOM ENGRAVING SERVICES

Extron is pleased to offer custom engraving services for AAPs, MAAPs, Blank Control Modules, Contact Closure Remotes, and the CTL208CM 8-button serial control panel. You can use the engraving to clearly indicate signal type, input numbers, or any other labeling required to make signal connections clear and easy.

 Engraving is all capital letters.
- ✓ **Engraving Color:**
 White: Black Engraving
 Black: White Engraving
- ✓ **Engraving Process:** Letters / Numbers / Symbols
 are laser engraved, then filled with color.

Order Information

To order engraving for any of the AAPs, MAAPs, Blank Control Modules, Contact Closure Remotes, or the CTL208CM please refer to the instructions below and on the Engraving Order Forms. You can copy the Engraving Order Forms from the catalog or download PDF versions of these forms from the Extron Web site at <http://www.extron.com/engraving>

Instructions For Custom Engraving Orders

1. Check the Module Size

Determine the size of the connector module that is to be engraved. If you are ordering engraving for single-space MAAPs, use the Single MAAP Engraving Order Form. For double-space MAAPs, use the Double MAAP Engraving Order Form. For all AAPs, use the AAP Engraving Order Form. There are separate engraving order forms for the CCR204, CCR306, CM-5BB, CM-20BB, and CTL208CM.

2. Specify Connector Module & Quantity

Completely fill in the information at the top of the Engraving Order Form. Be sure to include the purchase order number, the part number of the connector module to be engraved as well as the number of modules to receive identical engraving.

3. Fill in the Boxes

The Engraving Order Forms have a template with "X" marks showing where engraving can be located on the module. Fill in the boxes indicating the text

and location for the engraving. Each box will allow one of the following: a letter, a number, or a blank space. Any box that is left blank will not be engraved. Unless otherwise specified, Extron will left justify all engraving that is selected for the left side of the plate, and right justify engraving that is selected for the right side of the plate. The left and right justification creates a uniform look for the A/V modular plates once they are installed onto the mounting frame or faceplate.

Corner Engraving

Selected plates have boxes that should be used to indicate the letters, words, or numbers that are to be engraved. See form for reference and more info.

Center Engraving

Center engraving is only available for XLR, RJ-45, RJ-11 double size MAAPs, and all AAPs except single-space AAPs with three connectors.

The Top Center Header and Bottom Center Footer sections of the Double MAAP and AAP Forms each

contain eight boxes that may be used to indicate the letters, words, or numbers that are to be engraved.

4. Get Engraving Prices

For assistance with engraving prices, call Extron at: **714.491.1500** or **800.633.9876**.

5. Submit Your Engraving Order and Purchase Order

Submit one Engraving Order Form for every unique plate design and every module model ordered. If identical engraving is required on several modules, then submit only one order form for each model number ordered. Be sure to include a purchase order that specifically authorizes purchase of the Extron products as well as the engraving service charges.

Fax Submission

Fax the completed engraving order form(s) and your purchase order to Extron at: **714.491.1517**.
